

Bilaga 1. Litteratursökning

Arbetet med en systematisk översikt kännetecknas av en omfattande och systematisk sökning av forskningslitteratur. Detta är en detaljerad beskrivning av den sökstrategi som använts i den systematiska översikten *Kontroversiella frågor i religionskunskap – lärares handlingsalternativ i undervisningen*.

Källor som använts i sökningarna

KÄLLA	ÄMNESOMRÅDE	SÖKTEKNIK
ERIC	Utbildning	Blocksökning/söksträng
Education Source	Utbildning	Blocksökning/söksträng
PsycInfo	Psykologi, pedagogik	Blocksökning/söksträng
Google Scholar	Ämnesövergripande	Citeringssökning
SwePub (Sverige)	Ämnesövergripande	Blocksökning/söksträng

Redovisning av de exakta sökningarna i respektive källa följer nedan under rubrikerna

- Sökningar i vetenskapliga databaser
- Citeringssökning

Söktekniska förklaringar

Fältkoder

TI = Titel

AB = Abstract

SU = Ämnesord från databasleverantören EBSCO's ämnesordsindex.

DE = kontrollerat ämnesord från den specifika databasens ämnesordsindex.

Booleska operatörer

Booleska operatörer som AND, OR och NOT är en typ av sökkommandon som kan användas för att utöka eller begränsa en sökning.

Exempel på booleska operatorers funktion

religion AND education ger träffar där båda orden förekommer.

Religion OR theology ger träffar där minst ett av orden förekommer.

Religion NOT theology ger träffar där religion förekommer men inte theology.

NOT university NOT primary ger träffar där university förekommer endast om också primary förekommer.

Andra sökkommandon

Närhetsoperator N = villkor för inom hur många ord ifrån varandra ett ord kan förekomma. Exempelvis religious N10 education innebär att religious måste förekomma max 10 ord från education.

* = Trunkering. Ett sökord med asterisk innebär att sökordet fångar alla ändelser av ordstammen. Religio* fångar exempelvis religious, religion och religiosity.

"" = Frassökning med citattecken. En sökning på exempelvis "wicked problem" ger träffar på den exakta frasen.

Att kombinera termer och booleska operatorer

För att specificera vilka termer som ska kombineras med varandra och med vilka booleska operatorer används parenteser. Med hjälp av fältkoder kan sökningen styras till att ge träffar i specifika fält såsom en studies titel eller i en studies abstract. OBS! Fältkoderna kan se olika ut beroende på databas och vilken plattform databasen ligger på. I våra exempel nedan anges fältkoder för databasleverantören EBSCO:s plattform.

Exempel

TI ((religious OR theology) AND (teaching OR education)) fångar studier där minst ett ord från den första och den andra parentesens förekommer i studiens titel.

TI (religious OR theology) OR AB (religious OR theology) fångar studier där minst ett av sökorden förekommer i studiens titel, abstract eller både och.

Citeringssökning

Citeringssökningen gjordes i mars 2025, med utgångspunkt i 16 studier som vid tillfället för sökningen var aktuella att inkludera i översikten. Som citeringsdatabas användes *Google Scholar* och referenserna till de citerande studierna samlades in med hjälp av verktyget *Publish or Perish*. Totalt samlades unika 396 referenser in. Efter dubblettrensning återstod 349 studier som inte redan fångats av huvudsökningen och som relevansgranskades av projektledaren och den biträdande projektledaren. Av dessa kvalitetsgranskades 50 studier av biträdande projektledare. Inga studier bedömdes hålla tillräckligt hög kvalitet för att kunna inkluderas i översikten.
